**USAID**  
FROM THE AMERICAN PEOPLE

Maternal and Child  
Survival Program

USAID's ***Child Survival and Health Grants Program***'s community-based projects have contributed to ending preventable child and maternal deaths in 65 countries.

## Community interventions strengthen health systems.

In the Netrokona District of Bangladesh, World Renew trained more than 1,000 community health volunteers through four **People's Institutions** — civil society structures that create village groups to improve maternal and child health.
